

Amendments to the Specification

Please make the following amendments to paragraphs [0037] of the specification as filed:

[0037] The camera listener interface 60 monitors the camera button 46. When a user activates the camera button ~~46~~ 60, a signal is sent to the microprocessor 38. This signal may be an interrupt signal. When the camera listener interface 60 is invoked, it may notify the microprocessor 38 that it will be the handler of interrupts associated with the camera button 46. Thereafter, when the camera button 46 is pressed, the camera listener interface 60 is notified.
